

Creating a Dockerfile

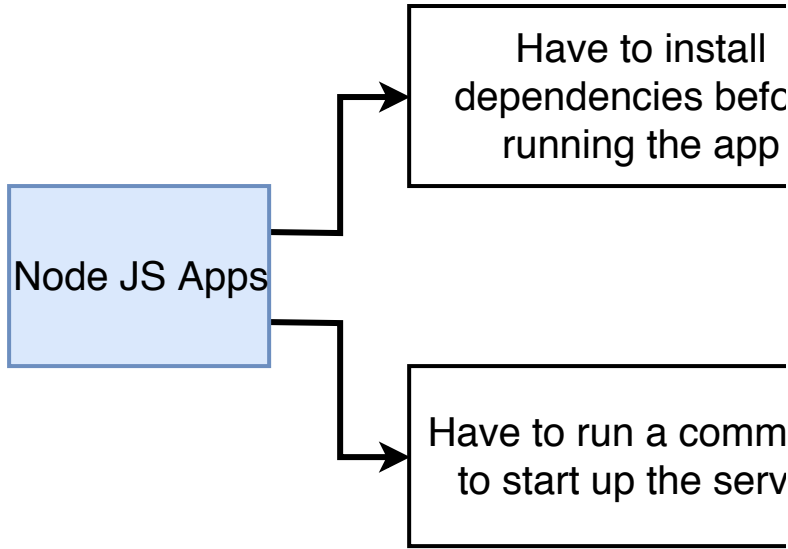

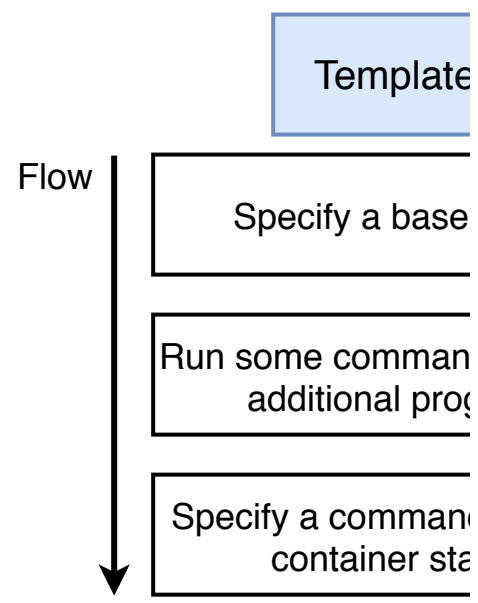

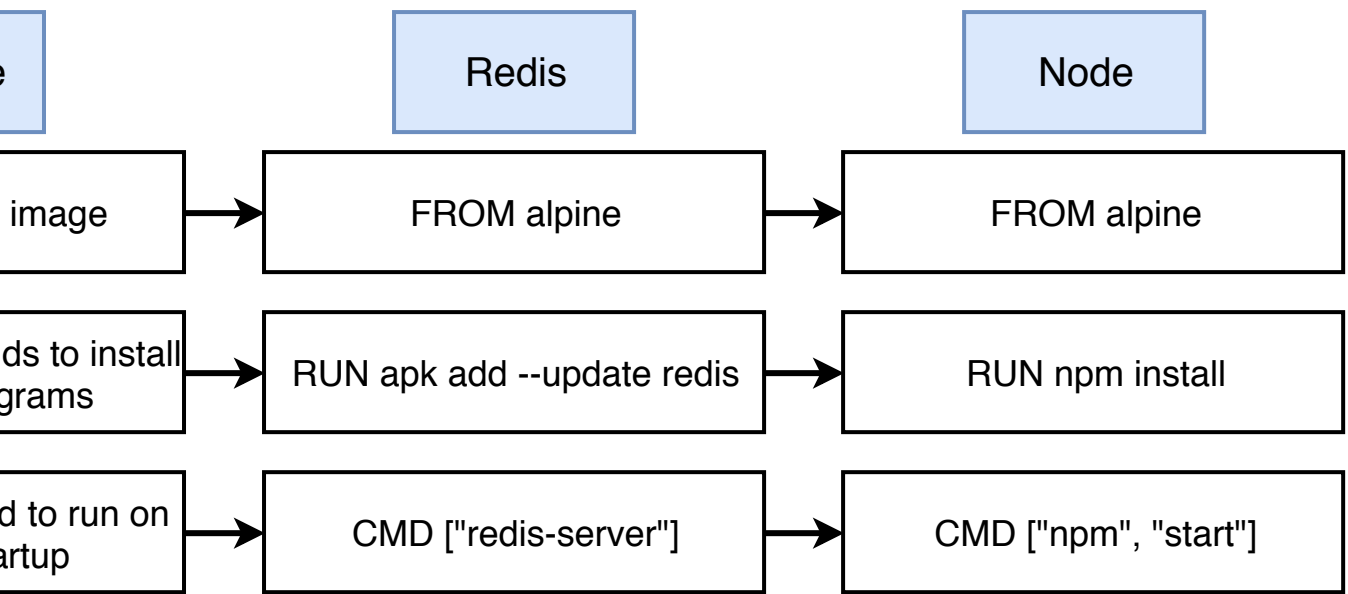

- S web app
- ockerfile
- m dockerfile
- container
- from a browser

Disclaimer

We're going to do a few things slightly wrong!

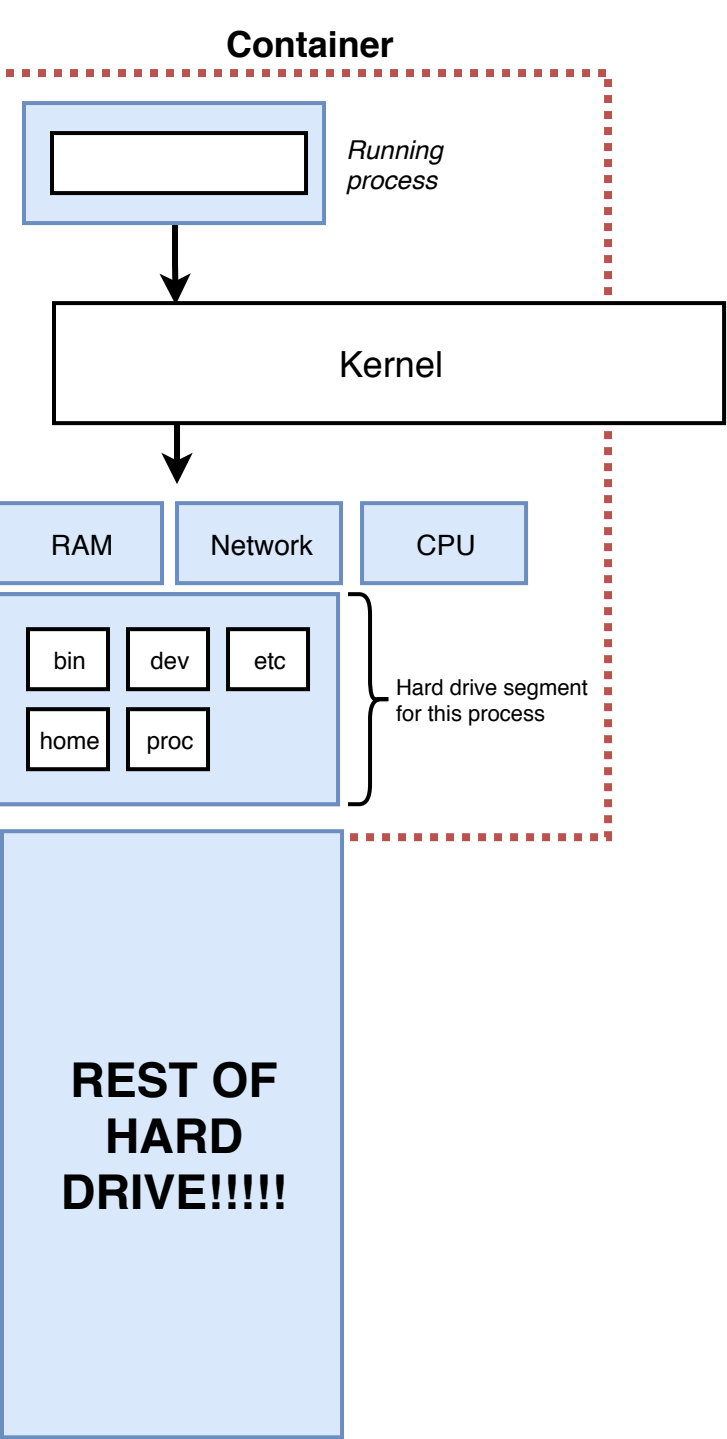

Programs Included in the Alpine Image

Not much

FROM	node:alpine
RUN	npm install
CMD	["npm", "start"]

Node:alpine Image	
FS Snapshot	Startup Command
<div><div>bin</div><div>dev</div><div>etc</div><div>home</div><div>proc</div><div>▲</div></div>	<div>???</div>

Instruction telling Docker Server what to do		Argument to the instruction
FROM	node:alpine	
COPY	./ ./	
RUN	npm install	
CMD	["npm", "start"]
